

User Manual – MYRA AI Assistant Application

Introduction

Welcome to MYRA, an AI-powered Android application designed to provide users with a smart, secure, and user-friendly digital assistant experience. This user manual explains how to install, access, and use the application features effectively.

System Requirements

To run the application smoothly, the following requirements are recommended:

- Android device with Android 8.0 or higher
- Stable internet connection
- Minimum 2GB RAM
- Firebase-supported Google services enabled

Installation Guide

Step 1: Download the Application

Download the APK file or install the application from the provided source.

Step 2: Enable Installation Permission

Go to:

Settings → Security → Allow Unknown Sources

Enable permission if installing manually through APK.

Step 3: Install the Application

Open the APK file and click “Install.” Wait for the installation process to complete.

Step 4: Launch the App

After installation, open the MYRA application from the app drawer.

User Registration

Creating a New Account

1. Open the application.
2. Click on the “Sign Up” button.
3. Enter the required information:
 - Email Address
 - Password
4. Click “Create Account.”
5. Your account will be registered successfully.

User Login

Logging into the Application

1. Open the application.
2. Enter your registered email and password.
3. Click on the “Login” button.
4. After successful authentication, the dashboard screen will open.

Dashboard Screen

The dashboard is the main screen of the application where users can access all features.

Dashboard Features

- User profile access
- AI assistant features
- Navigation controls
- Data management options
- Account settings

The dashboard is designed with a clean and user-friendly interface for smooth navigation.

AI Assistant Features

MYRA provides AI-powered assistance for users through intelligent interaction features.

Main Functions

- Smart communication
- Automated assistance
- User interaction support
- Real-time responses
- Personalized experience

Firebase Integration

The application uses Firebase for:

- Secure authentication
- Cloud data storage
- Database management
- User account security

Firebase helps maintain reliable and secure application performance.

Data Management

Users can:

- Save data securely
- Update personal information
- Access stored information
- Manage account details

All user data is securely stored within the application database.

Accessibility Features

The application supports accessibility improvements for better usability.

Accessibility Support Includes

- Speakable button descriptions
- Responsive interface
- Easy navigation system
- User-friendly controls

Security Features

MYRA includes several security measures to protect user information.

Security Functions

- Secure login system
- Password authentication
- Protected cloud storage
- Firebase security integration

Troubleshooting Guide

Problem: Login Error

Solution:

- Check internet connection
- Verify email and password
- Restart the application

Problem: Application Crash

Solution:

- Clear app cache
- Update the application
- Restart the device

Problem: Firebase Connection Issue**Solution:**

- Ensure internet connectivity
- Verify Firebase configuration
- Restart the app

Frequently Asked Questions (FAQs)**Q1: Is the application free to use?**

Yes, the application is available for users according to project requirements.

Q2: Is user data secure?

Yes, MYRA uses Firebase authentication and secure cloud storage for protection.

Future Updates

Future versions of MYRA may include:

- Voice assistant support
- Multi-language system
- Dark mode
- Face recognition login
- Advanced AI automation
- Push notifications

Contact and Support

For technical support or assistance, users can contact the application developer or project team through the provided communication channels.

Conclusion

MYRA is designed to provide users with a secure, intelligent, and modern Android application experience. The app combines AI-powered functionality, Firebase integration, and user-friendly design to improve digital interaction and productivity.
